

This report is to summarize the results of the White Sands community survey entitled, "Ranking possible White Sands projects". The survey was conducted, and report written by a third party in early May 2023 at the request of White Sands Council.

## Section 1

Once the results were in from the survey they were reviewed for validity. There were three entries done with the same name, so only the latest of these three pairs was used in the first table below. With these three duplicates removed, there were 144 total unique entries in the survey.

A visual of the rankings from the survey is included below as Figure A:
