

Mayor Lorne here,

There has been some rumours and concern that myself and council are happy about the Paradise Shores RV development. We are definitely not happy with this development and all the folks I have been talking to from around the lake feel the same.

99% of the people who have talked to me are worried about the unknown and potential effects that this development will have on our Village. We have been doing everything we can to anticipate what likely impacts will be and develop some strategies to lessen those impacts as much as possible within the scope of what we have control over.

At the end of the day, though we may not be happy, I feel confident that we will have made significant changes to the outcome in our favour.

All the best Lorne
